RESOLUTION No. 002

THE ONE WAY OUT OF THE GLOBAL FINANCIAL CRISIS

With concern and anxiety, the Board of the International Treasury Monetary One ascertains that the global epidemic, caused by the Corona Virus Covid-19, leads to a shut down of the World Economy, overstrains the worldwide Health and Welfare Systems and compounds the imminent collapse of the World Finance Fiat System.

WHEREAS of these threatening tendencies, the International Treasury Monetary One, hereinafter referred to as "ITM1", took the decision to urge the development of a problem-solving Monetary Reform.

WHEREAS global financial crisis finding deficiencies in existing systems financial regulation, forced to look for a way out of the situation in the World financial market, to identify the main directions of action improving the sustainability of banking systems and avoiding crises like the current. It caused the necessity for International Treasury Monetary One to rethinking the principles of bank regulation and the need to develop and implement new approaches and methods for assessing systemic risks, establishing counter-cyclical capital adequacy norms and formation of reserves for possible loan losses during periods of economic ascents and downturns.

RESOLVED, that the monetary reform takes in consideration

- (1) the permanently impairment of the leading world currencies;
- (2) the superior level of global-scale debts;
- (3) the boosting tendencies to print money without real secured backup value;
- (4) the hereby caused setback of the USD indexed trading system;
- (5) the use of a Money multiplier, leaving excessive credit reserves in banks;
- (6) the imminent negative consequences of the pending Global Currency Reset (GCR).

Furthermore RESOLVED, that ITM1 will deploy their huge portfolio of Bank Balance Sheet Gold and Off-Balance Sheet Gold as security to back-up the Monetary Reform.

ITM1 as owner and assignee has the nearly entire Global Gold Reserves under management.

This fact is recognized by all the regulators of the World Finance System as IMF, World Bank, BIS, UN etc and offers the perspective to place a solution with national, ideological and economic interests.

WHEREAS with consequent accrual of our Resolution No. 001 "Anti Crisis Financial Measures", published on the 7th of April 2020, we recommend that the GOLD STANDARD has to be implemented in the World Finance, and fast.

We advocate (1) the introduction of XAU, the currency code for Gold, as index for one general World payment standard and (2) the design, issuance and printing of the series of Treasury Bills of the World currency "TBM1", directed by the ITM1 and affiliated partners.

WHEREAS integrating the positive features of the Special Drawing Rights (SDR), TBM1 will be used as the prospectively major international element for the formation of official foreign exchange reserve systems, for the regulation of the payment balances and for measuring the value of new national currencies.

RESOLVED, International Treasury M1, as Owner and Manager of the backing gold assets and as Safe Guard and Creator of the related currency codes, introduces the following solution approaches and concrete set of measures:

(1) Put into effect immediately the final regulations of Basel III for the Introduction of the Gold Standard by advocating XAU as sole World payment standard index for a new World Currencies;

(2) Implement three (3) different new World reserve currencies into the World Financial System, calculate, setup and align them to the value of XAU and arrange the worldwide circulation;

(3) Install the new World reserve currencies under the following specific names:

- a) "Golden Soviet Ruble" – 1 (One) Golden Soviet Ruble = 0.987412 grams of gold;
- b) "Gold USA Dollar" – 1 (One) Gold us Dollar = 1.2345 grams of gold;
- c) "Golden ECU" – 1 (One) Golden ECU = 1 ounce of gold.

(4) Create an exchange rate of "World money" in relation to World reserve currencies for the period of the crisis and for the period of elimination of post-crisis consequences;

(5) Issue and print the gold backed bank notes, denominated in the above-mentioned World Reserve Currencies and organize the system to place them worldwide in the Treasuries, their National Banks, Reserve Banks and/or Central State Banks in order to increase and consolidate the gold balance of each country and force and enable the issuance of national currencies;

(6) TBM1 accepts as payment for tax payments and as a replenishment of banks' reserves;

(7) Motivate, urge and support these receiving entities to study, analyze and finally define terms and conditions for the expansionary financial and monetary policies, in order to originate and stimulate a secured international commodity and exchange trading system;

(8) Create an issuance and allocation system which lead to an understandable classification and evaluation of the currencies defining the value-centered backup model of the currencies;
